

## SIG Video Annual General Meeting

### 29 August 2022, at ESERA conference Cappadocia, Turkey

Meeting hosted by Jaume Ametller, reporting by Kathrin Otrell-Cass

#### 1. Reporting Activities of the SIG

- In 2022, we conducted an online meeting “at” the University of Girona, Catalonia, Spain (9th and 11<sup>th</sup> November 2022).
- Presentations and discussions spread over 3 afternoons/early evenings
- Data discussions and discussions about the purpose of a video research SIG at ESERA (exchange of methods of data collection, analysis, reporting or should we think about why/when video data can be used, what is it we learn that is above and beyond other data sources)

#### 2. Election of new coordinators

Kathrin (coordinator) explained that she is finishing the coordination of the SIG. The members were invited to nominate new successors for the coordination. Jaume Ametller and Alba Cortés Morales take over the coordination of the SIG.

#### 3. 2024 network meeting

Kathrin proposes she would be happy to host an event in 2024 at the University of Graz, Austria. She will liaise with the new coordinators to share details.

#### 4. Any other business

David Christoph Weiler suggests the SIG to think about how to support best practices for writing ethics proposals for video-based research. Also, a list of essential papers for junior researchers in the field of video-based research could be useful, making the SIG more attractive to emerging scholars. Maybe this could be made available on the ESERA SIG page to support the community. It was also discussed which video-based forms are included in the SIG (gathering data from videos, evaluating videotape classes, using videotaped lessons in education teacher education and using explanatory videos)
