

## Annual report for ESERA Special Interest Group 5 – Science Identities

Coordinators:

Henriette T Holmegaard (University of Copenhagen)

Louise Archer (University College London)

In 2019 the Special Interest Group supported the SIG membership by:

- **SIG Business Meeting at the ESERA Conference in 2019**  
*The meeting engaged members in mapping of research carried out by SIG-members (including present and future research). The aim was to make the network visible and accessible, so that researchers with similar research could exchange ideas and experiences.*
- **Invited SIG Symposium at the ESERA Conference in 2019**  
*We arranged the symposium 'Engaging With Issues Of Culture And Power Within Science Identities Research', with contributions from Mary Atwater (University of Georgia, USA), Lucy Avraamidou (University of Groningen, Netherlands), Louise Archer (University College London, UK), Lene Møller Madsen (University of Copenhagen), Henriette Tolstrup Holmegaard (University of Copenhagen)*
- **Continued work on a book for the ESERA/Springer series.**  
*The book portrays the research currently being carried out in the SIG. The book is expected to be launched at the ESERA conference in 2021, in Portugal*
- **Two newsletters**  
*One of these newsletters served to survey members on their preferred modes of communication*
- **The appointment and announcement of a new SIG early career researchers' ambassador**
- **Social gatherings for SIG members at both the ESERA and NARST conferences in 2019**
